ABOUT ME

I love the ever-changing nature of the software development industry and **I am thrilled to have chosen a career path where I will always be learning.** I also love the diversity of the tech community - I feel like I have found my people!

I'm a former physiotherapist that decided to change career to become a software engineer. I have embedded myself in the tech industry by attending meetups, enrolling in the LevelUp program at ThoughtWorks and studying the Software Engineering Immersive course at General Assembly, starting my first position as a junior software engineer right after.

THINGS THAT I'M PROUD OF

The winning team for the judge's choice award
Domain Innovation Week (Dec 2020)

Project: Start Chasing Goals

The winning team for the judge's choice award
Domain Innovation Week (Jun 2020)

Project: My Future Mortgage

PROFESSIONAL EXPERIENCE

JUNIOR SOFTWARE ENGINEER

Domain (Set 2019 - NOW)

- Building component-driven web applications with Javascript/Typescript using React, SCSS, Emotion, GraphQL and NextJS.
- Test-driven (TDD) whenever possible, heavily quality focused.
- Exposure with third-party integrations via Restful APIs
- Exposure to continuous integration and continuous deployment.
- Exposure to software releases to staging and production with feature flags.
- Cross-discipline collaboration between UX/UI designs, product managers and developers.

SOFTWARE ENGINEERING IMMERSIVE STUDENT

General Assembly (Mar 2019 - Jun 2019)

- Building web applications with Node.js and Ruby on Rails.
- In-depth front-end development with JS, React.js and Vue.js.
- Integration with third-party Restful APIs.
- Deploying code to cloud providers such as Heroku.
- Team collaboration with Agile workflow and Git.

TRAINEE SOFTWARE DEVELOPER

ThoughtWorks - LevelUp (Aug 2018 - Oct 2018)

Throughout the training I learned about Agile practices (inceptions, stand-ups, story writing, agile, sprints, continuous delivery, test-driven development, retrospectives) and how to work as an efficient, fully functioning and communicative team

SKILLS

Javascript | React | NextJS | Typescript | Node.js

GraphQL | Git | Mocha | Jest | React Testing Library | AIly

HTML 5 | CSS 3 | SASS | Emotion | Styled Components
